Service completed by: Kevin Fonseca

Services	qty	unit price	amount
100-amp homerun from Installation of a dedicated 100-amp electrical line from the main panel to the specified location, providing safe, reliable power for high-demand appliances or equipment and ensuring your electrical system meets current safety and usage requirements. This cost is significantly higher due to the length of the run. The vast distance causes voltage drop which would be a big issue. It might be worth seeing if PGE would set a few power poles and extend their feed across to the shed to have its own meter panel. It would be significantly cheaper.	1320.0	\$45.00	\$59,400.00
Priced per foot with trenching, wire, and labor			
New Install - Switch/Receptacle New switch/ receptacle with box and homerun wiring/ switch leg. Includes all wires and material	4.0	\$180.00	\$720.00
New Lighting Fixture Installation 2x4 vapor tight efficient LED light with wiring and conduit	8.0	\$225.00	\$1,800.00
New Subpanel 125-amp load center to feed new branch circuits in shed	1.0	\$650.00	\$650.00

Services subtotal: \$62,570.00

Subtotal	\$62,570.00

Dear Board Members,

My name is Kevin Fonseca, and I am the owner of Freedom Electric LLC — a veteran-owned electrical contracting company serving Calaveras, Amador, Sacramento, and San Joaquin Counties.

I am a United States Marine Corps veteran who served in both Operation Iraqi Freedom and Operation Enduring Freedom. After 15 years in the electrical trade, I founded Freedom Electric in 2020 with a mission to bring the same discipline, reliability, and integrity I learned in uniform to every job I take on.

I am reaching out because your district's mission resonates deeply with me. The work you do to honor veterans and serve this community is something I am proud to support in any way I can.

Freedom Electric holds a California C10 Electrical Contractor license and is fully insured. We specialize in both residential and commercial electrical work, including underground service runs, panel upgrades, generator installations, and general electrical maintenance. As a veteran-owned small business, we are also pursuing DVBE (Disabled Veteran Business Enterprise) certification, which may provide additional value on publicly funded projects.

I would welcome the opportunity to introduce myself to your board, walk your facility, and discuss how Freedom Electric might serve the district — whether that is a current project, routine maintenance, or simply being a trusted local resource for the future.

Thank you for your service to our veteran community. I would be honored to serve yours.

Semper Fidelis,

Kevin Fonseca
